

**LET'S REPOWER  
OUR COMMUNITIES  
WITH CLEAN ENERGY  
FROM THE SUN  
AND WIND.**

FIND OUT  
HOW WE CAN  
**#REPOWER**  
**VICTORIA**  
STARTING  
RIGHT HERE...

## WHY #REPOWER?

We can't keep powering our lives with polluting fuels from the last century. Climate change is here, right now. Our federal government and the big polluting energy companies won't lead, so it's up to us.

Right across Australia, communities, groups and businesses are ditching coal and gas, repowering their lives with clean energy like wind and solar, and calling on their elected representatives to support this transition.

## WHAT'S HAPPENING IN VICTORIA?

Victoria has abundant wind and sun, plus a target to power our state with 40 percent renewable energy by the year 2025. To reach that goal, the Andrews government needs to get on with passing legislation and committing to build large-scale wind and solar farms. Meanwhile, the Coalition must stop their attacks on renewable energy jobs and investment, and support the state's renewable energy target.

## WHAT CAN I DO?

You can help #Repower Victoria by calling on your local MPs to support a clean energy future for Victoria.

**Sign the petition at [envict.org/repower-petition](https://envict.org/repower-petition)**

Plus there's a Repower group in your area! Ask them how you can help.
