

# THE PROBLEM WITH

# GAS

Methane gas is **expensive**, **polluting** and damages our **climate** and **health**. The gas industry has claimed for decades that it is cheap and clean. But new research shows it is ...

- X Expensive:** Victorian households spend more on gas than any other state. Right now, the gas industry is making record profits while our energy bills keep going through the roof.
- X Polluting:** Drilling and burning gas is wrecking our climate. Gas is mostly made of methane, a powerful climate pollutant that remains in the atmosphere for decades and traps around 80 times more heat than carbon dioxide.
- X Damaging our health:** We used to think it was safe to use in homes, but recent research shows gas is responsible for 12% of childhood asthma and can be as harmful as second-hand smoke.

## ADD YOUR NAME

Call on the state government for a bold plan to get Victoria off gas

[envict.org/getoffgasvic](http://envict.org/getoffgasvic)

All Victorian households can get off gas and enjoy **cleaner air** and **lower bills**.

Turn over to find out how >>

# LOTS OF PEOPLE ARE READY TO **GET OFF GAS!**

Instead of gas, we can heat our homes, have hot showers and cook with modern, efficient **electric appliances** powered by renewable energy.

## The **SOLUTIONS** we need:

**Help with the upfront cost** of replacing gas appliances, like rebates and zero interest loans to make sure no one gets left behind

**More information** about how you can get started electrifying your home

**Make gas corporations pay their fair share of tax** and stop blocking plans to electrify

**Support community-wide solutions** like bulk buys of electric appliances

**Learn more about how to get your home off gas** including links to government rebates and incentives at
